Now these are all of the TOP trending keywords relating to "marketing plan" that people are searching for now.

Search engines such as google LOVE content, especially new, updated, and trending content. Create content that people are actively searching for and google will send you the love in terms of traffic and rankings!

If I was building a site with a topic on “marketing plan”. I would focus on creating content for ALL of the trending keywords relating to marketing plan as seen above.

Traditionally, content creators head over to their favorite keyword research tool like Google adwords keyword planner. Do a search for marketing plan and see a list of 700+ keywords, then just select the top keywords with the most search volume and create content based off of those. This is the difficult path to traffic and rankings.

In modern times, you’ll have a much higher chance by focusing on creating content for trending keywords. Give google what it wants and already loves. Provide a site with content that people are actually actively searching for and you can see traffic and rankings increasing faster. This is a solid SEO trending content strategy that you should definitely put to use.

ENJOY 😊
